

Rikim Rana

Coimbatore, India | +91 8807539818

rikimrana1@gmail.com | linkedin.com/in/rikim-rana | github.com/rikream

PROFESSIONAL SUMMARY

Computer Science undergraduate with experience in backend development, AI-powered applications, and API development using Python, Django, and FastAPI. Skilled in building scalable backend systems, REST APIs, and data analysis tools. Experienced with machine learning frameworks including PyTorch and scikit-learn. Passionate about developing intelligent systems, backend architectures, and real-world AI applications.

EDUCATION

KPR Institute of Engineering and Technology

Bachelor of Engineering in Computer Science and Engineering

- Current CGPA: 8.5 / 10

Coimbatore, India

Aug. 2024 – April 2028

Janata Secondary School

Higher Secondary Education (Class XII)

- GPA: 3.51 / 4.0

Palpa, Nepal

2024

TECHNICAL SKILLS

Languages: Python, Java, C, SQL

Backend Development: Django, FastAPI, REST API Development

Machine Learning: PyTorch, Scikit-learn, NumPy, Pandas

Web Development: HTML, CSS, Streamlit

Tools & Platforms: Git, GitHub, Docker, Bash, VS Code

Core Concepts: Data Structures, Algorithms, Object-Oriented Programming, API Design

PROJECTS

Streamlit Chat Analysis Tool | Python, Streamlit, Pandas

Jan. 2024

- Developed a multi-page Streamlit web application to analyze WhatsApp chat exports and visualize conversation trends.
- Processed and analyzed more than 10,000 chat messages to generate insights including activity trends, word frequency, and emoji usage.
- Built interactive visualizations and dashboards for chat data analysis using Python data processing libraries.

AI Chatbot API | Python, FastAPI, LLM APIs

Dec. 2023

- Developed a backend AI chatbot system using FastAPI and large language model APIs to generate structured responses.
- Designed RESTful API endpoints to process user queries and return AI-generated responses.
- Implemented a modular backend architecture allowing integration with machine learning models and external APIs.

Django Task Management System | Django, Python

Nov. 2023

- Developed a web-based task management system using Django framework with full CRUD functionality.
- Implemented backend logic using Django models, views, and templates.
- Designed relational database schema for efficient task storage, retrieval, and management.

CODING PROFILES & OPEN SOURCE
